AWS

PERSONAL SKILLS

Team player
Time management
Fast learner
Attention to detail
Creativity
Problem solving
Adaptability

EDUCATION

Associates Degree - General Studies
Quinsigamond Community College
September 2009 - May 2011

SUMMARY

I'm Nicole Brooks, a Front-End Web Developer based in San Diego, California. With a strong commitment to personal growth and continuously expanding my expertise in web development, I approach each project with a collaborative mindset, meticulous attention to detail, and effective communication skills. My goal is to deliver exceptional user experiences that captivate and leave a lasting impression. Let's work together to create remarkable web experiences that bring your vision to life.

WORK EXPERIENCE

Front-End Developer

iCompaas December 2020 - Current

- Developed and maintained the iCompaas web app using React.js with Redux for efficient state management, ensuring seamless functionality and exceptional user experiences.
- Implemented Node.js and Express as a middle layer between the web app and the backend, effectively handling complex business logic and ensuring seamless data flow and communication.
- Utilized CSS along with popular frameworks like Ant Design and Material-UI to create visually appealing and responsive web interfaces.
- Migrated class-based components to functional components with hooks, and led many initiatives to improve the readability and maintainability of the codebase.
- Led the design process, creating wireframes and visual mockups that aligned with project requirements and user expectations.
- Mentored a team of interns, providing guidance and support in their learning journey while overseeing their projects effectively.

Front-End Developer (Intern)

Victorise July 2020 - September 2020

- Collaborated with the development team as an intern, contributing to the creation and enhancement of web applications using React Native.
- Actively engaged in learning and applying best practices in React Native development, acquiring new skills, and expanding technical knowledge.
- Supported the team in troubleshooting and debugging, ensuring the smooth functioning of web applications and resolving issues promptly.
- Demonstrated a strong work ethic and a passion for web development, consistently seeking opportunities to learn and grow as a front-end developer.
- Embraced feedback and implemented suggested improvements, actively contributing to the continuous improvement of web applications and development processes.

Developer in Training

Learn Academy - San Diego, CA April 2020 - July 2022

- Completed 480 + hours of direct coding experience in an intensive web development boot camp.
- Gained proficiency in JavaScript, Ruby, and React applications.
- Utilized effective communication and cooperation through pair and mob programming projects with teammates.
- Practiced test-driven development to produce full-stack Ruby on Rails applications complete with databases.
