SKILL HIGHLIGHTS

Languages

JavaScript
HTML
CSS

Technologies

React / Redux
Bootstrap, MUI, Antd, Styled-Components
Sass
Node.js,
Express
Jest
Git
Docker
AWS

PERSONAL SKILLS

Team player
Time management
Fast learner
Attention to detail
Creativity
Problem solving
Adaptability

EDUCATION

Associates Degree - General Studies
Quinsigamond Community College
September 2009 - May 2011

SUMMARY

I'm Nicole Brooks, a Front-End Web Developer based in San Diego, California. I am deeply committed to personal and professional growth, specializing in React and building high-quality, cross-browser web applications. My approach combines a collaborative mindset, meticulous attention to detail, and strong communication skills, all aimed at delivering exceptional user experiences. With a proven track record of transforming complex project requirements into engaging, user-focused solutions, I am eager to bring your vision to life. Let's create something amazing together.

WORK EXPERIENCE

Front-End Developer

iCompaas

November 2020 - December-2023

- Utilized modern React features, including Hooks, along with Redux for optimal state management in the iCompaas web application, enhancing functionality and user experience through performance optimization, adaptive UI design, and improved accessibility and responsiveness.
- Utilized modern React features, including Hooks, along with Redux for optimal state management in the iCompaas web application, enhancing functionality and user experience through performance optimization, adaptive UI design, and improved accessibility and responsiveness.
- Designed and developed responsive web interfaces, utilizing CSS with Ant Design and Material-UI frameworks to deliver aesthetically pleasing and user-friendly experiences across various devices.
- Wrote and executed comprehensive automated API tests using Postman, achieving extensive coverage and validation of backend functionality.
- Guided the design process from conceptualization to execution, creating wireframes and visual mockups that accurately met project specifications and user expectations.
- Continuously explored and integrated advanced React.js features, including extensive use of useMemo and useCallback for performance optimization.
- Leveraged REST APIs for efficient data retrieval and manipulation, enabling scalable and flexible interactions between the front-end and backend.

Front-End Developer (Intern)

Victorise

July 2020 - September 2020

- Collaborated with the development team as an intern, contributing to the creation and enhancement of web applications using React Native.
- Actively engaged in learning and applying best practices in React Native development, acquiring new skills, and expanding technical knowledge.
- Supported the team in troubleshooting and debugging, ensuring the smooth functioning of web applications and resolving issues promptly.
- Embraced feedback and implemented suggested improvements, actively contributing to the continuous improvement of web applications and development processes.

Developer in Training

Learn Academy - San Diego, CA

April 2020 - July 2020

- Completed 480 + hours of direct coding experience in an intensive web development boot camp.
- Gained proficiency in JavaScript, Ruby, and React applications.
- Utilized effective communication and cooperation through pair and mob programming projects with teammates.
- Practiced test-driven development to produce full-stack Ruby on Rails applications complete with databases.
